Union365 — Complete Union Management (BLERP)

A powerful, all-in-one platform built specifically for unions. Union365 helps locals manage members, dues, grievances, collective agreements, communications, documents, events, and day-to-day operations from one secure platform.

Expanded -

Your Union. One Powerful Platform. (EXPANDED)

Union365 is a comprehensive union management platform designed to bring the day-to-day operations of a Local together in one secure, centralized system.

From managing member information and dues to tracking grievances, collective agreements, documents, communications, events, and job action, Union365 gives union leaders and staff the tools they need to work more efficiently and stay organized.

With features designed for Union Presidents, Secretary-Treasurers, Membership Officers, Business Representatives, Shop Stewards, Grievance Officers, and other union roles, Union365 helps everyone work from the same information while reducing administrative workload.

Key capabilities include:

- Member and membership management
- Grievance and case tracking
- Collective agreement management
- Dues and payment tracking
- Secure document storage
- Communications and mass messaging
- Digital forms and workflows
- Events and shared calendars
- Strike and mobilization management
- Hiring hall and dispatching tools
- Member portals and public websites
- Reporting and analytics
- Customization to fit your Local's processes

Union365 is built specifically around real union work — giving organizations a modern platform without forcing them to change the way they serve their members.

MemberMate — Member Support (BLERP)

A 24/7 virtual assistant designed for union members. MemberMate provides instant answers about collective agreements, workplace rights, policies, and union resources—helping members get the information they need while reducing the workload on union representatives.

A Smarter Way to Support Your Members. (EXPANDED)

MemberMate is a member support solution designed to give union members quick, convenient access to information about their workplace and collective agreement.

Instead of waiting for a union representative to answer routine questions, members can interact with MemberMate to find information based on documents and resources provided by their union.

MemberMate can help members navigate collective agreement information, policies, procedures, and other union-provided resources — making important information more accessible while helping reduce repetitive questions and administrative demands on union staff.

MemberMate helps unions:

- Provide members with instant access to information
- Make collective agreement information easier to navigate
- Reduce repetitive questions directed to union staff
- Improve member access to union resources
- Provide support outside traditional office hours
- Create a more accessible and responsive member experience

MemberMate is designed to complement — not replace — the relationship between members and their union representatives, giving members another convenient way to access information when they need it.

InFavour — Digital Voting & Engagement (BLERP)

A modern digital voting solution designed to help unions conduct secure, accessible, and efficient votes. InFavour makes it easier to engage members and manage voting processes for elections, ratifications, and other important union decisions.

Secure Digital Voting for Modern Unions. (EXPANDED)

InFavour is an online voting platform built specifically for unions and labour organizations. It makes it simple to conduct secure, accessible, and transparent elections, ratification votes, referendums, polls, and other member votes.

Members can participate directly from their phone or computer without needing to download an app or remember another password. For union administrators, setting up a vote can be completed quickly using a member list, ballot, and defined voting period.

InFavour is designed to make the entire voting process easier — from distributing ballots to collecting votes and producing audit-ready results.

Key features include:

- Online union elections and voting
- Ratification votes and referendums
- Secure member authentication
- Email and SMS voting invitations
- Anonymous and encrypted voting
- Real-time vote tracking
- Instant results
- Detailed audit reports
- Canadian data hosting
- Union365 integration
- Fully managed voting services

With Canadian-hosted infrastructure and built-in audit capabilities, InFavour gives unions a straightforward way to move important democratic processes online while maintaining security, transparency, and member confidence.

About Us Page (PAGE 4-5)

Canadian Technology. Built for Canadian Unions.

UnionSolutions is a Canadian technology and services company dedicated to supporting labour unions and organizations across Canada. We provide a one-stop shop for the technology, tools, and services unions need to manage their day-to-day operations and better serve their members.

Our approach is simple: unions should have access to modern technology that is built with their needs in mind, by Canadian companies that understand the Canadian labour environment.

Built in Canada. Hosted in Canada.

Every product within the UnionSolutions ecosystem is 100% Canadian and hosted in Canada. From our partnership with a union management platform to member support and digital voting solutions, we are committed to providing Canadian unions with technology that keeps their data within Canada.

Our platforms are designed with the security, privacy, accessibility, and operational needs of Canadian labour organizations in mind.

One Partner. Everything Your Union Needs.

Managing a union involves far more than maintaining a membership list. Unions need tools for administration, member communication, grievances, collective agreements, voting, events, documents, payments, reporting, and countless other day-to-day responsibilities.

UnionSolutions brings these solutions together under one umbrella.

Our growing suite of products includes:

Union365 — A comprehensive union management platform designed to help Local Unions manage their members, operations, communications, documents, grievances, dues, and more. Every deployment of Union365 is 100% unique and tailored to fit your organization's every needs.

MemberMate — A member support platform that helps members quickly find answers and information from their union's resources and collective agreements.

InFavour — A secure digital voting platform built for Canadian unions, supporting elections, ratification votes, referendums, and other member voting requirements.

Together, these platforms provide unions with a connected technology ecosystem that can grow alongside their organization.

Built Around the Labour Movement

UnionSolutions isn't trying to make unions fit into generic business software. We build solutions around the way unions actually work.

We understand that every Local, National, District, and labour organization has different structures, responsibilities, and processes. That's why our goal is to provide flexible technology that supports the unique requirements of organized labour.

Whether you're a small local looking to modernize your operations or a large organization managing thousands of members, UnionSolutions is focused on providing the tools and support you need.

Our Mission

Our mission is to modernize and simplify the way Canadian unions operate by providing accessible, secure, Canadian-built technology through a single trusted partner.

We believe technology should make union work easier, not more complicated.

One Canadian company. One connected ecosystem. Everything your union needs to operate, communicate, and serve its members.

Frequently Asked Questions (Page 6)

About UnionSolutions

What is UnionSolutions?

UnionSolutions is a Canadian technology and services provider focused exclusively on supporting labour unions and organizations across Canada. We bring together a growing suite of union-focused products designed to help organizations manage their daily operations, communicate with members, provide member support, and conduct secure digital voting.

Who is UnionSolutions built for?

UnionSolutions is built specifically for the Canadian labour movement. Our solutions can support Local Unions, District Councils, Provincial organizations, National Unions, and other labour organizations of varying sizes.

Is UnionSolutions a Canadian company?

Yes. UnionSolutions is a Canadian company focused on providing technology and services to Canadian labour organizations.

Are your products Canadian?

Yes. The UnionSolutions product ecosystem is 100% Canadian, with our platforms and services designed specifically for the Canadian market and Canadian labour organizations.

Where is my union's data hosted?

Our platforms are hosted in Canada. Canadian data residency is a core part of our commitment to providing Canadian unions with technology built for their environment.

Why should our union choose a Canadian technology provider?

Canadian unions have unique operational, privacy, labour, and regulatory considerations. Working with a Canadian provider means your technology partner understands the Canadian environment and is focused specifically on serving Canadian organizations.

Getting Started

How do we get started with UnionSolutions?

The first step is to speak with our team. We'll learn about your union, your current systems, your membership, and the challenges you're trying to solve. From there, we can recommend the solutions that make the most sense for your organization.

How long does implementation take?

Implementation timelines depend on the size of your organization, the products being implemented, the amount of data being migrated, and your specific requirements. Our team will establish an implementation plan with your organization before getting started.

Can you migrate our existing member data?

We can work with your organization to assess your existing data and determine the appropriate migration process for moving information into your new UnionSolutions platform.

Will our staff receive training?

Yes. Training and onboarding are important parts of successfully implementing new technology. Our team can provide guidance and training to help your staff become comfortable with the platform.

Can we book a demonstration?

Absolutely. We encourage unions to book a demonstration so our team can show you how the solutions work and discuss how they can fit into your organization's existing operations

See What UnionSolutions Can Do for Your Union Let's Build a Better Way to Run Your Union

Every union has different needs, challenges, and workflows. That's why we take the time to understand your organization before recommending the right solutions.

Book a personalized demo with the UnionSolutions team and see how our partnered Line of Canadian-built platforms can help simplify your day-to-day operations, improve member engagement, and bring your union's technology together in one place.

Explore Union365, MemberMate, and InFavour and discover how they can work independently or together as part of a complete union technology ecosystem.
